Fabio Sousa Max

JUNIOR AI AUTOMATION & INTEGRATION SPECIALIST

Canary Islands, Spain | +34 650 921 879 | sousamax.fabio@gmail.com

Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Junior AI Automation & Integration Specialist with more than two years of enterprise IT Help Desk experience at Atos. Builds personal projects with Python, n8n, FastAPI, SQL, REST APIs and AI services to connect systems and automate workflows. Portfolio work demonstrates data validation, human approval, error handling, retries, logging and automated testing. Combines incident troubleshooting and technical documentation with business-management experience.

TECHNICAL SKILLS

Programming & Data: Python, FastAPI, Pydantic, SQL, PostgreSQL, SQLite, JSON, CSV

Automation & Integration: n8n, Make, REST APIs, webhooks, Postman, OpenAI API

Workflows & Reliability: Validation, human approval, retries, logging, pytest, mocking, health checks

Operations & Delivery: Linux, Bash, PowerShell, Docker, Docker Compose, Git, GitHub Actions; CI/CD fundamentals

Business Tools: Airtable, Google Sheets, Gmail, Slack

Identity & Security: IAM, RBAC, SSO; Microsoft Entra ID fundamentals, least privilege, access reviews

PROFESSIONAL EXPERIENCE

IT Help Desk Agent | August 2020 - November 2022

CRIT INTERIM ESPAÑA ETT S.L. / ATOS GLOBAL DELIVERY CENTER CANARIAS S.L.

Initially hired through CRIT Interim and subsequently directly by Atos to support an international enterprise client in a confidential service environment.

- Delivered first-line support via telephone, email and web channels in English and Spanish.

- Diagnosed and resolved known technical incidents using established troubleshooting procedures.

- Owned incidents through resolution or escalation, documenting investigation steps and updates.

Company Manager & Self-Employed Part-Owner | December 2022 - Present

PERENQUÉN TENERIFE S.L.

- Managed daily operations, customer service, suppliers, purchasing, inventory, invoicing and performance.

- Supervised approximately 10 employees and coordinated schedules; became a self-employed part-owner in January 2024.

SELECTED PERSONAL PROJECTS

OpsPilot AI | GitHub

Built a Docker Compose environment connecting n8n with FastAPI. Validates operational requests and returns structured AI triage. Includes tests with a mocked AI client and a GitHub Actions workflow.

Stack: Python, FastAPI, n8n, OpenAI API, Docker Compose, GitHub Actions

Intelligent Invoice Processing | GitHub

Built an n8n workflow for AI invoice extraction, validation, human approval, duplicate checks and Airtable records. Added retries, audit logs and Gmail success/failure notifications.

Stack: n8n, OpenAI, Airtable, Gmail, JSON

SQL and FastAPI Service | GitHub

Built a Docker-packaged FastAPI service with authenticated endpoints, PostgreSQL, validation, health/readiness checks, parameterised SQL and transactions. Includes SQLite local development and automated tests.

Stack: Python, FastAPI, SQL, PostgreSQL, SQLite, Pydantic, pytest, Docker

GitHub Repository Monitor | GitHub

Built a reusable GitHub REST API client with optional authentication, pagination, timeouts, retries, rate-limit handling, validation, logging and JSON output. Includes tests, Postman examples and incident reports.

Stack: Python, REST APIs, pytest, Postman, JSON

SUPPORTING WORK

Operations Scripts Toolkit - Bash and PowerShell health checks, API testing, log inspection and Docker troubleshooting.

SaaS Identity and Access Review - fictional onboarding/offboarding, IAM/RBAC, permission troubleshooting and a PowerShell access review.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor's Degree in Industrial Design - Universidade do Vale do Itajaí (UNIVALI), Brazil | 1999-2003

Microsoft Learn - SC-900 learning paths (in progress). Completed security, compliance and identity concepts; continuing Microsoft Entra, security solutions and Purview. Official exam not yet taken.
