Professional Summary

Junior automation and integration specialist with more than two years of enterprise IT help desk experience supporting users in English and Spanish. Builds tested Python services and workflow automations using FastAPI, SQL, PostgreSQL, REST APIs, n8n, Docker, and GitHub Actions. Portfolio work demonstrates API troubleshooting, authentication, data validation, structured logging, automated testing, and technical documentation.

Technical Skills

Automation Platforms: n8n, Make

Programming and Backend: Python, FastAPI, Pydantic, JSON, CSV

Databases: PostgreSQL, SQLite, SQL, relational design, joins, transactions, parameterised queries

APIs and Integration: REST APIs, webhooks, Postman, curl, Swagger/OpenAPI, OpenAI API

Testing and Quality: pytest, unittest, endpoint testing, mocking, test coverage

Containers and CI/CD: Docker, Docker Compose, GitHub Actions

Technical Operations: Incident investigation, troubleshooting, logging, escalation, documentation

Featured Projects

SQL and FastAPI Service

Built a Docker-packaged FastAPI service with PostgreSQL and SQLite, authenticated GET and POST endpoints, Pydantic validation, health and readiness checks, parameterised SQL, and transaction handling. Added 10 automated tests with 96% application coverage.

Skills: Python, SQL, FastAPI, PostgreSQL, SQLite, Pydantic, pytest, Docker

Project: [View on GitHub](#)

GitHub Repository Monitor

Built a reusable Python client for the GitHub REST API with bearer-token authentication, pagination, timeouts, retries, exponential backoff, rate-limit handling, validation, structured logging, and JSON storage. Verified success and failure paths with 13 automated tests and Postman.

Skills: Python, REST APIs, pytest, Postman, JSON, authentication, logging, troubleshooting

Project: [View on GitHub](#)

OpsPilot AI - Containerised Operations Triage

Built a Docker Compose environment combining n8n and a tested FastAPI service. The API validates operational requests, uses the OpenAI Responses API for structured triage, and returns a category, urgency, recommended action, confidence score, and request ID.

Skills: Python, FastAPI, OpenAI API, n8n, Docker Compose, GitHub Actions, automated testing
