Professional Summary

Junior AI automation and integration specialist with more than two years of enterprise IT help desk experience supporting users in English and Spanish. Builds tested automation solutions using Python, FastAPI, n8n, REST APIs, OpenAI, Docker, and GitHub Actions. Experienced in incident investigation, structured troubleshooting, escalation, documentation, data validation, and error handling.

Technical Skills

Automation Platforms: n8n, Make

Programming and Backend: Python, FastAPI, Pydantic, unittest, JSON, CSV

APIs and Integration: REST APIs, Webhooks, OpenAI API, Swagger/OpenAPI

Business Integrations: Airtable, Google Sheets, Gmail, Slack

Containers and CI/CD: Docker, Docker Compose, GitHub Actions

Workflow Engineering: Validation, conditional routing, retries, error handling, logging, human approval

Technical Operations: Incident investigation, troubleshooting, escalation, customer communication, documentation

Featured Projects

OpsPilot AI - Containerised Operations Triage

Built a Docker Compose environment combining n8n and a tested FastAPI service. The API validates operational requests, uses the OpenAI Responses API for structured triage, and returns category, urgency, recommended action, confidence, and a request ID.

Skills: Python, FastAPI, OpenAI API, n8n, Docker, Docker Compose, GitHub Actions, automated testing

Project: [View on GitHub](#)

Intelligent Invoice Processing Automation

Built an n8n invoice-processing workflow with AI extraction, validation, human approval, duplicate detection, Airtable audit logs, retry handling, and success and failure notifications.

Skills: n8n, OpenAI, Airtable, Gmail, validation, human approval, error workflows, retries

Project: [View on GitHub](#)

AI CSV Classification Pipeline

Built a Python pipeline that validates CSV records, classifies valid products through the OpenAI API, retries temporary failures, logs processing events, writes structured results, and runs in Docker.

Skills: Python, OpenAI API, CSV, validation, logging, retries, unittest, Docker
